

# LATITUDE® Patient Management System

The most rapidly-adopted remote device management system\*

## Assurance

*Peace of mind for you and your patients*

- The LATITUDE Patient Management system can notify you of specific changes in your patient's cardiac and device status such as:
  - ❑ Weight
  - ❑ Arrhythmia
  - ❑ Lead impedance and battery life

## Exceptional Experience

*World-class service for 1,963 clinics representing 498,862 monitoring months<sup>2</sup>*

- Over two years of remote management experience
- 90,326 enrolled patients<sup>1</sup>
- 6,178 patients managed jointly by device- and health-following physicians<sup>2</sup>
  - ❑ Ability to individually select alerts based on your personal preferences
- Live, dedicated multilingual support for you and your patients

## Enhanced Therapy

*More comprehensive cardiac care with remote monitoring between office visits*

- Percentage of patients receiving alerts<sup>2</sup>
  - ❑ 3.5% of patients had atrial arrhythmias for > 24 hours
  - ❑ 10% of patients had shock therapy delivered for spontaneous ventricular arrhythmias
  - ❑ 0.3% of patients experienced an urgent alert

\*Data based on number of patients reported at six-quarters post launch. Data on file.

<sup>1</sup>Analysis of aggregate de-identified LATITUDE Patient Management system patient enrollments as of 03/14/08. Data on file.

<sup>2</sup>Analysis of aggregate de-identified LATITUDE Patient Management system data from 67,410 active patients as of 03/14/08. Data on file.

## **LATITUDE® Patient Management System from Boston Scientific CRM**

### **Intended Use**

The LATITUDE Patient Management system is intended for use to remotely communicate with a compatible pulse generator from Boston Scientific CRM and transfer data to a central database.

### **Contraindications**

The LATITUDE system is contraindicated for use with any pulse generator other than a compatible pulse generator from Boston Scientific CRM. Not all Guidant or Boston Scientific pulse generators are compatible with the LATITUDE system. For contraindications for use related to the pulse generator, refer to the System Guide for the pulse generator being interrogated.

### **Precautions**

The LATITUDE system is designed to notify clinicians within 24 hours if new pulse generator alert conditions are detected by the Communicator. Pulse generator data will typically be available for review on the LATITUDE system within 15 minutes of a successful interrogation. However, data availability and alert notification can take up to 24 hours or the next business day. Note that data will not be available and alert notification cannot occur if:

- The Communicator is unplugged or is not able to connect to the LATITUDE system through an active phone line.
- The pulse generator and the Communicator cannot establish and complete a telemetry session. This session must be initiated by the patient if he or she has a pulse generator that uses inductive telemetry.
- The Communicator becomes damaged or it malfunctions.

Up to two weeks may elapse before LATITUDE first detects the conditions mentioned above and additional time may be required for notification and resolution of the condition. During this time, no new patient data, device data, or alert notifications since the last successful data transmission will be available.

### **Adverse Effects**

None known.

### **Refer to the product labeling for specific instructions for use. Rx only.**
